

Ronin Release Notes

Date :	2016.07.26
IMU Firmware :	V3.1
GCU Firmware :	V 1.3
DJI Assistant App iOS :	V 1.1.28
DJI Ronin Assistant App Android :	V 1.0.6
PC Assistant	V 2.4
MAC Assistant	V 2.4
User Manual	V 2.0

What 's New?

GCU firmware v1.3, PC/Mac Assistant v2.4.

- Added support for the Remote Start/Stop system.
- Fixed the issue of battery temperature being incorrectly displayed in the DJI Assistant.

Ronin Release Notes

Date :	2016.04.18
IMU Firmware :	V3.1
GCU Firmware :	V 1.2
DJI Assistant App iOS :	V 1.1.27
DJI Ronin Assistant App Android :	V 1.0.6
PC Assistant :	V 2.2
MAC Assistant :	V 2.2
User Manual :	V 2.0

What 's New?

- Improved SmoothTrack speed for the pan axis.
- Fixed the issue of roll axis drift when shooting.
- DJI Lightbridge 2 support. Now the Ronin can be controlled by DJI Lightbridge 2.

Operation: Toggle the flight mode switch to select the SmoothTrack Speed. Toggle the transformation switch to enable or disable SmoothTrack. Horizontal movements on the left stick control the roll axis. Horizontal movements on the right stick control the pan axis. Vertical movements on the right stick control the tilt axis.

Ronin Release Notes

Date :	2016.01.28
IMU Firmware :	V3.0
GCU Firmware :	V 1.2
DJI Assistant App iOS :	V 1.1.25
DJI Ronin Assistant App Android :	V 1.0.6
PC Assistant :	V 1.8
MAC Assistant :	V 1.8
User Manual :	V 1.8

What 's New?

- The GCU firmware has been updated to v1.2 to support the new Ronin Intelligent Battery (model no. 844297-4350mAh-15.2V).

Ronin Release Notes

Date :	2015.07.16
IMU Firmware :	V3.0
GCU Firmware :	V 1.0
DJI Assistant App iOS :	V 1.1.25
DJI Ronin Assistant App Android :	V 1.0.6
PC Assistant :	V 1.8
MAC Assistant :	V 1.8
User Manual :	V 1.8

What 's New?

- Updated the DJI Assistant App for iOS to v1.1.25, which added options for Silent Mode, Roll Control, and roll axis settings for SmoothTrack to support the latest IMU firmware v3.0 and GCU firmware v1.0.
- Updated the User Manual to v1.8.

Ronin Release Notes

Date :	2015.07.06
IMU Firmware :	V3.0
GCU Firmware :	V 1.0
DJI Assistant App iOS :	V 1.1.24
DJI Ronin Assistant App Android :	V 1.0.6
PC Assistant :	V 1.8
MAC Assistant :	V 1.8
User Manual :	V 1.6

What 's New?

- Updated the DJI Ronin App for Android to v1.0.6, which added options for Silent Mode, Roll Control, and roll axis settings for SmoothTrack to support the latest IMU firmware v3.0 and GCU firmware v1.0. Also changed the name of Onboard Controller to Thumb Controller.

Ronin Release Notes

Date :	2015.06.30
IMU Firmware :	V3.0
GCU Firmware :	V 1.0
DJI Assistant App iOS :	V 1.1.24
DJI Ronin Assistant App Android :	V 1.0.4
PC Assistant :	V 1.8
MAC Assistant :	V 1.8
User Manual :	V 1.6

What 's New?

Upgraded the IMU firmware to v3.0, the GCU firmware to v1.0, the PC/MAC Assistant to v1.8, and the User Manual to v1.6.

- Added support for the Ronin Thumb Controller, which can be used to remotely control the Ronin's motions.
- Added options in the PC/MAC Assistant: Enable Silent Mode, Roll Remote Control Off, and roll axis settings for SmoothTrack. Refer to the User Manual or the PC/MAC Assistant for details.
- Optimized the Auto Tune Stability function to improve the accuracy of the configured stiffness settings.
- Optimized the Calibrate System function to calibrate the gimbal faster and more accurately.
- Changed the way the user enters Briefcase Mode: rotate the handle bar 90 degrees so that it is perpendicular to the ground.
- Added to the ability to reset the password of the Bluetooth connection using the remote control: turn on the remote control and the Ronin, then quickly move both control sticks to the inner bottom corners within the first 8 seconds of powering on the Ronin.
- Improved protection for the motors.
- Fixed issue of the Ronin functioning abnormally when its roll axis is manually rotated beyond 90 degrees.
- Improved motion control and smoothing when the Ronin resets its position if bumped or rotated.
- Reduced gyro noise.

Notes:

- Be sure to click Default after the firmware upgrade, otherwise the Ronin may not function properly.
- Be sure to restart and then calibrate your Ronin after the firmware upgrade to prevent it from drifting. Click Calibrate System to begin the calibration, and restart the Ronin again after the calibration is complete. (During the calibration, it is normal for the motors to power off, and you must not touch the Ronin.)
- It is normal for your Ronin to shake momentarily when the Auto Tune Stability function is configuring the stiffness settings.
- The motors will exhibit more stiffness for the same stiffness values after the firmware update. Adjust the stiffness values if necessary. It is recommended that you increase the tilt axis stiffness value if the Auto Tune Stability function configures a value below 30.
- The zero value of the SmoothTrack deadband has been adjusted so that it now represents absolute zero, improving the control accuracy of the Ronin when handheld stationary. With the new scale, it is highly recommended to set the SmoothTrack deadband of each axis to 5 or above during any kind of movement to achieve the optimal performance.
- It is highly recommended that you adjust the stiffness settings by hand if you are in Silent Mode.

Ronin Release Notes

Date :	2014.12.31
IMU Firmware :	V2.3
GCU Firmware :	V 0.12
DJI Assistant App iOS :	V 1.1.20
DJI Ronin Assistant App Android :	V 1.0.2
PC Assistant :	V 1.4
MAC Assistant :	V 1.4
User Manual :	V 1.4

What 's New?

- Release the DJI Ronin App V1.0.2 for Android.

Ronin Release Notes

Date :	2014.11.07
IMU Firmware :	V2.2
GCU Firmware :	V 0.12
DJI Assistant App iOS :	V 1.1.20
PC Assistant :	V 1.4
Mac Assistant :	V 1.4
User Manual :	V 1.2

What 's New?

- Release the Mac Assistant V1.4.
- Upgraded the PC Assistant to V1.4.
- Addressed following issues with new IMU firmware (V2.2):
 - Smoother transitions between the three modes of operation, Underslung Mode, Upright Mode, Briefcase Mode.
 - Addressed the possible occurrence of horizontal drift in situations during constant acceleration and deceleration scenarios (i.e. in a moving vehicle, aircraft, etc...).

Notes:

- Updated User Manual to V1.2 in accordance with new Mac Assistant.

Ronin Release Notes

Date :	2014.07.24
IMU Firmware :	V2.1
GCU Firmware :	V 0.12
DJI Assistant App iOS :	V 1.1.20
PC Assistant :	V 1.2
User Manual :	V 1.0

Functions:

- Three Operation Modes
 - Underslung Mode
 - Upright Mode
 - Briefcase Mode
- Built-in, Independent IMU Module
- DJI Specialized Gimbal Drive Motors with Encoders
- Bluetooth Module
- USB Connection
- 2.4 GHz Receiver
- Temperature Sensor
- DJI Advanced 32-Bit DSP Processor
- D-Bus/PPM Receiver Supported
